- light extruded welded aluminum body
- integrated sail cover
- soft eye topping lift
- main sheet padeyes for soft shackles
- custom mast track for easy furling
- extra groove on boom for shade tent
- gybe preventer (option)

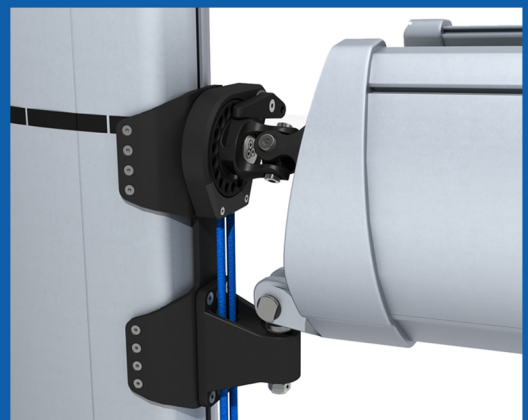

## MADE TYPE C \_furling boom

The Made Type C furling boom offers the best quality and reefing performance for yachts from 37' up to 50'.

Based on our in-house developed aluminum extrusions the boom can be easily adjusted to length for yachts with E sizes up to 8 mtr. Maximum P size is 22 mtr. The boom body is fully welded to form a rigid and elegant boom.

The Type C is standard delivered with a manual endless line drive but can also be equipped with an electric drive.

The boom can be delivered with our Made boom vang to maximise reefing performance.

integrated drive and gooseneck unit
