MAIN FEATURES_TYPE S

- super elegant shape
- all CNC milled parts for exact fitment
- aluminum epoxy bonded body
- heavy duty through-mast-axle on bearings
- emergency tiller on front of mast
- integrated sail cover
- carbon mandrel
- in mandrel electric drive (option, pictured)
- aft boom hydraulic drive (option)
- integrated led lights 12 or 24 V (option)
- Awl Grip® paint finish in every possible colour

MADE TYPE S_furling boom

The 'S' stands for superyacht and that is what the Made Type S furling boom offers. Comfortable furling and safe reefing performance for yachts from 46' up to 80'.

Built from bended and epoxy bonded aluminum 5083 sheets, this boom combines a high tech building method with an elegant tapered shape.

The type is standard delivered with a manual drive in front of the mast. An axle runs through the mast for maximum strength and safe operation.

The boom can be delivered with an electric in-mandrel drive or hydraulic drive aft side of the boom.

in-mandrel electric drive and mast axle
