MADE TYPE C

MAIN SAIL FURLING SYSTEM FOR 32+FT YACHTS

Every sailor knows that the only constant at sea is change, and nothing shifts as swiftly as the wind. With the Made furling boom, you're always ready to adapt. Our innovative mainsail furling systems ensure effortless and secure reefing, no matter the conditions.

Introducing the Made Type C furling boom—where elegance meets efficiency. As the most stylish and cost-effective mainsail furling solution on the market, it's engineered to deliver top-tier performance without compromising quality or functionality.

Crafted from premium extruded aluminum and precision CNC-milled components, the Type C boom is expertly welded for unmatched strength and lightweight performance. Choose from a durable painted or natural anodized finish for a sleek, long-lasting look that complements any yacht.

Elevate your sailing experience with the Made Type C furling boom—designed for sailors who demand the best.

“SINGLE HANDED REEFING

MADE SIMPLE AND SAFE”

TYPE C furling boom X-Yachts 4.0

Built for versatility, the Type C boom operates with an endless line drive, easily powered by your existing manual or electric winch. For enhanced convenience, an integrated electric drive option is also available.

Designed with simplicity in mind, this plug-and-play system includes everything you need for seamless mainsail furling. Whether you adapt your existing sail or choose a custom-built mainsail, Made provides detailed instructions to help your sailmaker create a sail that maximizes the boom's performance.

Developed by cruisers for cruisers, the Type C furling boom is trusted by sailors worldwide and proven on demanding transatlantic passages. Experience the difference with Made—engineered for adventure.

MADE TYPE S

MAIN SAIL FURLING BOOMS FOR 55-80FT YACHTS

The Type S furling booms are engineered to set a new benchmark in quality and performance. Featuring an impeccable finish and powered by the most reliable electric or hydraulic drives on the market, these booms deliver unparalleled functionality and style.

Crafted from 100% recyclable aluminum, the Type S combines sustainability with innovation. Its sleek, minimalist design ensures maximum strength without compromise. Thanks to efficient production methods that minimize tooling and material waste, the Type S costs as little as 35% of a comparable carbon fiber furling boom—making it the smarter choice for sailors seeking value and performance.

Designed around the proven open-front concept, the Type S allows sails to furl as close to the mast as possible. This space-efficient design requires only a small track mast ramp, offering a streamlined and practical solution for your yacht.

Upgrade to the Type S furling boom—where premium quality meets exceptional affordability.
